Grade 10, 11 and 12 Cruising Science – Educator Guide and Learner Workbook

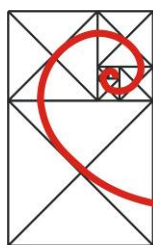

“Excellent book of notes! No setting of notes required and good challenging questions. Makes lesson preparation a breeze. A must have.”

Christa Booyens – Science teacher – Eden College, Durban

The **Cruising Science** workbook is the complete package that any learner would require to perform their best in Physical Science. This workbook is up to date with the National Core Syllabus and has been revised to comply with the latest amendments to the Physical Science syllabus. Features of this workbook include:

- Comprehensive **notes** that clearly explain concepts and principles
- **Worked examples** that learners are encouraged to attempt on their own to ensure that key concepts have been grasped
- **Extensive exercises**, gradually increasing from the most basic concepts to exam questions. **Answers** to all questions are included
- **Practicals** that are vital to the understanding of sections are included, along with questions that extend learners beyond the practicals themselves
- Practical **design tasks** – this is a key skill that learners need to be proficient with – to be able to design and execute a practical task from scratch
- **Application** of Physical Science in the world around us – very handy for those **LO3** questions in the exams.
